

SOLAR POWER FOR MISSIONS

Provides self sustaining, off grid electricity for Nigerian mission fields

Answer to prayer for our rural missionaries!

Now they can hold night-time events without the worry of candles or kerosene lamps.

They can play live and recorded audio broadcasts/sermons without the expense of batteries. They can even power a projector/LCD TV for greater impact. They can store some foods & medicine for longer in a fridge. They can also serve their communities with some free power - by charging phones, flash lights, batteries, etc.

We are currently installing in Kano & Kaduna areas.

Sponsor a lifetime of power for an investment of only \$1200!!
(any sponsorship amount is appreciated)

The system is also available for personal home use

System components		Comments
Solar Panel	120w	Will fully charge the battery to 780W in 6.5hrs of sunshine
Max power draw (inverter rating)	300W	total rating of items you can have on at the same time
Deep cycle battery 12v x 65Ahr	780W	max power available when battery is fully charged
Solar battery charger		Uses energy from panel to charge battery
Metal housing for battery & chargers with indicators		Includes Cables & connectors
4 x low energy bulbs & holders		These can be extended as required.
Grid battery charger - to charge from grid where available (☺☺) during low sunlight days or at night.		may be used on very cloudy days or to fast charge battery at night.
